

Additional file 1 (Supplementary Figure S1) iLINC5/L1000 PLK1-ERO1A perturbation convergence

a Context-dependent convergence

b Interpretation boundary

Convergence only in HCC515

PLK1-KD and ERO1A-KD signatures overlap in HCC515 ($\rho=0.38$) but not A549 ($\rho=0.05$).

PLK1-KD not reproducible

The PLK1 knockdown signature does not reproduce across the two cell lines ($\rho=-0.10$).

Not a molecular interaction

Signature overlap is not interaction, epistasis, pathway ordering or drug synergy.
